Innovative  
leisure

# Hi-Way

**Go  
out in  
the traf-  
fic and  
play! Hi-Way**

is a completely new generation in driving games. Designed for spectacular realism, Hi-Way puts your players literally in the driver's seat in the middle of speeding traffic.

**Watch the road!** Your skill and nerve is challenged every second. You climb in, your quarter fires it up. You step on the gas—excitement builds higher and higher as you fight to keep your car on the road (which is constantly moving every which way under your wheels!) and avoid crashing head-on into traffic as you try to pass slower cars.

You're driving against the clock (it's operator adjustable) to pile up as many miles as possible, so you have to be sharp—and quick! Look out for that curve!

**Shut down the competition!** You have a winning set of wheels with Hi-Way: indestructible molded fiberglass chassis, detachable "bucket" seat, reliable Durastrut<sup>®</sup> tested solid state circuits and monitor, and all-metal gas pedal make you king of the road.

Ideal for arcade play, bowling alleys—you name it.

Hi-Way's a profit winner any

way  
you look  
at it.

**Dimensions:**

Height 55",  
139.7cm, Width  
32.25", 81.92cm,  
Length 73.75", 187.33cm

**You're in the driver's seat.** Follow the Atari highway into the future—and big dollars. Get the jump on the daily gran prix. Contact us today at Atari, Inc., 2175 Martin Avenue, Santa Clara, CA 95050 (408) 984-1900. Or contact your local Atari "dealership."

Hi-Way—all it needs is wheels.
